

# **Study Plan - Postdoctoral Research**

**Name:** Kejun "Albert" Ying

**Education Completed:** Ph.D. in Biological Sciences, Harvard University (May 2025)

**Current Position:** Postdoctoral Researcher, Stanford University

**Duration:** June 2025 - May 2026

## **Educational Background**

I completed my Ph.D. in Biological Sciences at Harvard University in May 2025. I am now continuing my training as a postdoctoral researcher at Stanford University.

## **Current Research Position**

I work as a Postdoctoral Researcher in Dr. Tony Wyss-Coray's laboratory at Stanford University. This is standard academic training that follows graduate school completion.

## **Research Activities**

My daily work includes:

- Processing biological samples in the laboratory
- Performing basic data analysis using computer software
- Attending laboratory meetings and research presentations
- Assisting with routine experiments and data collection
- Learning new laboratory techniques under supervision

## **Professional Development**

- Attend weekly lab meetings
- Participate in training sessions
- Learn standard research methods
- Assist with laboratory administration tasks

## **Career Goals**

I plan to complete this postdoctoral training period to gain experience in biological research. After finishing this training, I will explore career opportunities in academia or industry.

## **Conclusion**

This postdoctoral position provides standard training following my doctoral studies. It is a normal step in academic career development that allows me to gain additional research experience before pursuing permanent employment.
